

# BIOFILM BUSTER

The background of the entire image is a stylized cross-section of the ground. The top half is a bright blue sky with radiating lines. The middle section is a layer of brown soil with many small, light-brown pebbles. A black irrigation line runs horizontally across the middle of the soil layer. A black T-junction emitter is connected to the line, and a fine spray of water is being emitted upwards from its top. The bottom section of the image is a darker, more uniform brown soil layer.

**CLEARs IRRIGATION LINE  
AND EMITTER CLOGS**

VOLUME: 1 Gallon (128 fl oz / 3785 mL)

# BIOFILM BUSTER

- ⚡ All-natural bio-enzyme clears biofilm clogs and restores irrigation systems to 100% capacity.
- ⚡ Designed to work with all irrigation systems including drip lines, emitters, tape, and pipes.
- ⚡ Can be used throughout the entire growing season.
- ⚡ Rapidly cleans out hydroponic and nutrient water reservoir accumulations.

## INSTRUCTIONS FOR DIRECT APPLICATION WITH AN INJECTOR

1. Only use non-chlorinated water with **BioFilm Buster Pro**.
2. For serious clogs set the injector ratio to 1:100, or for maintenance and preventative treatments set the injector to a 1:500 ratio.
3. Run system until **BioFilm Buster Pro** is injected throughout the irrigation lines.
4. Turn system off and allow **BioFilm Buster Pro** to sit in the irrigation lines for at least 8 hours.
5. Turn system on and water plants as normal. Irrigation lines will be cleared of any build-up and clogs.

**CAN BE APPLIED DIRECTLY THROUGH A RESERVOIR RATHER THAN AN INJECTOR.**
