

PALEOPOWER®

Put the Heartbeat Back Into Your Soil®

BIOLOGICAL GLYPHOSATE REMEDIATION

PaleoPower® Functions

- Reduces levels of glyphosate in soils and plants
- Releases bound phosphate in soils
- Promotes production of growth-promoting metabolites

PaleoPower® Benefits

- Increases crop yields
- Improves soil quality and overall health
- Restores a healthy soil microbiome
- Increases soil carbon
- Supports water retention

Improves Plant and Soil Health Through a Consortium of Beneficial Bacteria

A Unique Soil Probiotic

This organic formulation uses beneficial microorganisms to bioremediate glyphosate in soils and plants.

PaleoPower restores a healthy soil microbiome and increases plant yields, helping farmers and growers improve soil quality, crop productivity, and profitability.

U.S. Patent No. 12,420,322 – microbial glyphosate degradation technology

70,000+ acres, 25+ crop types, multi-state trials

Certified Organic Ingredients

Bacterial Consortium: 3.0%

Other Ingredients: 97%

PaleoPower® Makes the Difference

Independent, multi-year studies show that PaleoPower reduces glyphosate in soils and plants.

Healthy Soils = Healthy Plants = Healthy Foods
