

IDEAL FOR DRIP LINES, TAPE AND PIPES

- All-natural Bio-enzyme
- Restores clogged irrigation system to 100% capacity
- Biofilm Buster Pro can be used throughout the growing season.
- All-in-one treatment to maintain irrigation lines
- Rapidly cleans out hydroponic and nutrient water reservoir accumulations
- Single solution for clearing irrigation systems

Irrigation lines are cool and damp – perfect conditions for biofilms and other clogs to form.

BIOFILM BUSTER PRO APPLICATION DIRECTIONS

- 1 Only use non-chlorinated water with BioFilm Buster Pro.
- 2 For serious clogs set the injector ratio to 1:100, or for maintenance and preventative treatments set it to a 1:500 ratio.
- 3 Run system until BioFilm Buster Pro is injected throughout the irrigation lines.
- 4 Turn system off and allow BioFilm Buster Pro to sit in the irrigation lines for at least 8 hours.
- 5 Turn system on and water plants as normal. Irrigation lines will be cleared of any build-up and clogs.

Can be applied directly through a reservoir rather than an injector.

BIOFILM BUSTER PRO

**CLEAR
IRRIGATION LINE
AND EMITTER CLOGS**

100% NATURAL INGREDIENTS

BENEFITS OF USING BIOFILM BUSTER PRO INSTEAD OF CHEMICAL TREATMENTS

Irrigation lines are cool and damp — perfect conditions for biofilms and other clogs to form. When water mixed with fertilizer/nutrients runs through an irrigation line, this mixture carries small particles that “settle” when the line isn’t being used, allowing clogs to begin forming. Every time the irrigation line is used, this process repeats itself, until eventually the clog is large enough to block the irrigation line or emitters.

Biofilm clogs can be difficult to remove, and are resistant to most chemical treatments. Unlike harsh chemical treatments which are limited to the surface of the biofilm only, BioFilm Buster Pro’s enzymes actively digest all biofilm layers, restoring your irrigation system to 100% capacity.

PREVENTATIVE TREATMENT

To prevent clogs before they are large enough to block your irrigation system use regularly every **4-8 weeks**.

BIOFILM BUSTER PRO WORKS!

“I am the vineyard manager for Charles Krug, located in the Napa Valley. Last year I had the opportunity to use the microbial product BioFilm Buster Pro on our holding ponds and pipes.

We were told by AquaBella Organic Solutions that their product would help reduce sludge and organic material in our pipes. We did discover that this was true and the benefit that our sump pump did not get clogged was a great relief and time savings. In my previous experience the pumps filters would get clogged repeatedly, which was a real problem for us. We pumped out the pond multiple times and it went a lot smoother then in previous years.

We are still discovering additional benefits of using BioFilm Buster Pro and will be using it again this year.”
