

Mikro-Root

Bio-Fertilizer &
Phosphate Solubilizer

Best for:

Healthier, Disease-Free
Root Zones
Increased Phosphate,
Micronutrient Availability
Seed Germination

Contains more than 84 million Trichoderma
fungi that solubilize fixed phosphate in soil and
build healthy root zones.

net weight: 4 oz (113g)

Member of
AMERICAN
SOCIETY FOR
MICROBIOLOGY

Mikro-Root contains:

2 species of Beneficial Fungi ----- 2.0 x 10⁷ CFU / g
Trichoderma harzianum, Trichoderma viride

Inert Ingredients ----- 98.0%

Application: Water Suspension – Mix 1 teaspoon (2.5g) into 1 gallon of distilled or tap water, and drench the root area of plants/crops. Repeat 2–3 applications at 7–10 day intervals for better output.

Dry Application – Apply 1 tsp (2.5g) ~ 1 tbsp (5.0g) evenly to and around the root system while planting/transplanting. Water the root zone after application. Follow with 1–2 applications of the water suspension at 7–10 day intervals for better output.

Storage: Please store the product in a cool and dry area. Avoid direct sunlight.

Caution: Keep out of reach of children and animals.
