

# grubGONE!® G

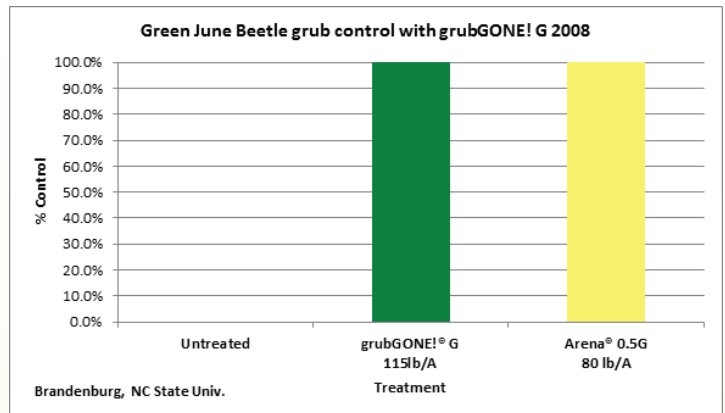

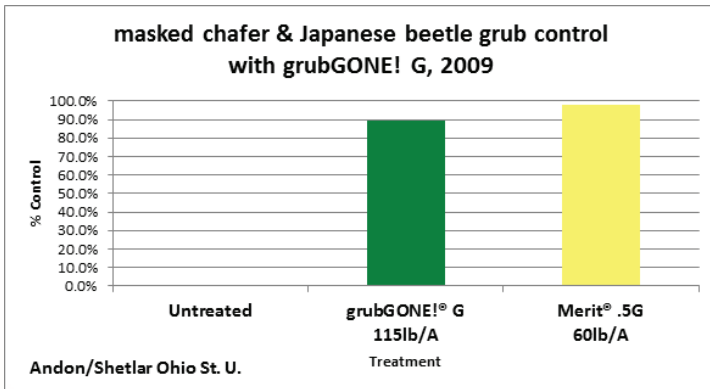

## Target the Pest, Not the Rest!®

A market proven BioInsecticide from **Phylom BioProducts Corp.** that helps protect the quality and value of landscape and recreational turf grasses and ornamental plants with the novel active ingredient, *Bacillus thuringiensis (Bt) galleriae*. It effectively controls susceptible white grubs (beetle larvae) upon ingestion of the Bt toxin. It is the first Bt insecticide powerful enough to be applied as a spreadable granule against 1st - 3rd instar grubs. Yet, **grubGONE!** demonstrated no adverse risks to non-targets tested. grubGONE! is registered for use on landscape and recreational turf grasses and ornamental plants. Potential use sites include golf courses, residential lawns, commercial grounds, parks, athletic fields, pet care facilities, cemeteries, sod farms or interior plant scape, greenhouses, nurseries, fields, and other turf grass-covered or landscape ornamental-planted areas.

### grubGONE! advantages:

- Protects the value of turf landscapes and ornamental plants by effectively controlling susceptible white grubs, billbugs and annual bluegrass weevils in the season of application.
- Helps manage resistance to chemistries with a new mode of action for IPM programs.
- Can be mixed with chemical grub controls with increased synergistic performance of both products.
- grubGONE! and Bt bioinsecticides provide a positive public perception.
- Shelf life is 18 months when stored as directed.
- No label restrictions for bees or flowering plants.
- OMRI Certified.

Phyllom BioProducts “Target the Pest, Not the Rest” New bio-insecticides grubGONE!®, beetleGONE!® and boreGONE!® protect the beauty, health and value of forests, farms and landscapes from beetle, weevil and grub attacks without harm to bees and non-targets. Phyllom’s suite of bio-insecticides are protected by issued and pending patents.
