Honey Bee Attractant

HONEY BEE FACTS

Research on honey bee attractants have been conducted for the past forty years. This research developed Queen pheromones to attract swarms, alarm pheromones to warn bees of danger, and general attract pheromones to direct worker bees to sources of food. The Honey Bee Lure attracts bees to increase pollination and yields of tree fruit, vegetables and berries.

Open White Pouch

Open Lure Cap

Attach Hanger

Hang Lure In Plants

EASY INSTRUCTIONS (Do not touch the lure, use gloves). Open the pouch, remove the lure. Open the top and attach twist tie to the Lure. Attach Lure to any tree or plant in your garden. Hang one lure per 200 square feet at the start of bloom. Replace lures every 2 to 3 weeks.

DO NOT USE TOXIC PESTICIDES WITH HONEY BEE LURES

KEEP OUT OF REACH OF CHILDREN AND PETS.
