

IV ORGANIC®

WHITE • WASH

Protection Against Damaging SUMMER SUNBURN • WINTER SUNSCALD

Use On Roses, Fruit & Nut Trees, Ornamental Trees & Shrubs

Non-Toxic * Environmentally Safe * Organic

NET WT: 3.5 OZ (100G) | MAKES 1 PINT

Active Ingredients:	
Garlic	3%
Cinnamon	2%
Inert Ingredients:	
Iron Oxide, Limestone,	
Mica, Milk & Silica	95%
Total	100%

WHITE

IV ORGANIC®

WHITE • WASH

JUST ADD WATER

Visit www.IVOrganics.com for more product details.

This effective formula, containing ALL organic ingredients, is a natural means to reducing the risks of trunk, branch & foliar damage caused by Summer sunburn (avocado and citrus are particularly susceptible); as well as Winter sunscald (bark damage caused by warm days followed by freezing nights).

CAN CONTENTS: 1 bag powder. **RECOMMENDED APPLICATION:** One or two brush-on coats per year should provide sufficient protection from sunburn and sunscald. Up to three (3x) times per year as a foliar spray -- especially young and tender new growth during the hottest months.

BRUSH ON DIRECTIONS: 1) ADD POWDER TO CAN. 2) FILL CAN NEAR TOP WITH WATER. 3) STIR WELL. 4) ADD MORE WATER, IF NECESSARY TO HAVE A FULL CAN OF PRODUCT. 5) STIR EVERY 5-10 MINUTES WHILE USING THIS PRODUCT TO ENSURE UNIFORMITY OF CONTENTS WHILE APPLYING PRODUCT TO TREE TRUNK AND BRANCHES. 6) APPLY WITH A PAINT BRUSH. CONTENTS SHOULD COVER APPROXIMATELY A DOZEN YOUNG TREE TRUNKS (3 GALLONS SIZE) WITH A SINGLE COAT. PROPERLY PREPARED PRODUCT SHOULD HAVE THE CONSISTENCY OF A 50% DILUTED PAINT.

FOLIAR SPRAY DIRECTIONS: MAY ALSO BE USED TO MAKE A TOTAL PLANT, INCLUDING FOLIAGE, SUN SCREEN SPRAY, BY DILUTING 1-2 TEASPOONS OF THE PREPARED 'BRUSH-ON' SOLUTION, PER GALLON OF WATER. IDEAL APPLICATION AT TIME OF TRANSPLANTING PLANTS AND TREES & TIMES OF EXTREME HEAT. CAN ALSO BE USED TO COOL OFF PLANTS TREATED WITH HORTICULTURAL PEST CONTROL OILS, AS OILS TEND TO INTENSIFY THE SUN'S RAYS THAT MAY INCREASE THE RISK OF SUNBURN. FILTER PRODUCT THROUGH STRAINER FIRST TO AVOID THE POSSIBILITY OF CLOGGING.

TREE PASTE DIRECTIONS: ADD 1/4 CUP (2 OZ) OF WATER TO CONTENTS. STIR WELL.

USE RESTRICTIONS

Always test a small area and wait a few days to ensure damage does not occur. First year bark growth on some plant species are typically too waxy for good adhesion of this product, requiring second and third coats to accomplish full coverage. Do not consume this product. If product gets into eyes, flush immediately with running water for at least 15 minutes. Wearing gloves is recommended to avoid any possibility of skin irritation.

STORAGE AND DISPOSAL

It is recommended that you only mix what you intend to use on the same day. Unused liquid (mixed) product may be refrigerated for up to 2 weeks, or frozen for up to 2 years. Powder that has not been mixed may be stored in a cool and dry area for up to 5 years. *Contents are environmentally safe.*

CAUTION KEEP OUT OF REACH OF CHILDREN
