- **Non-Toxic**
- **No Mess**
- **Easy to Use**
- **1" Monitoring Grid for Easy Insect Identification**

Part # FW-74

## UNIVERSAL INSECT MONITOR CARDS

Gardner's Insect Monitor Cards are designed to capture all types of insects that harbor in and around plants. Fungus gnats, white flies, aphids, thrips, and leafminers are just a few of the species attracted to our traps.

In order to maximize catch rates of the different species of insects we utilize two insect attracting colors on each trap:

***"Brilliant Blue"*** and ***"Yellow"***

We have perforated the traps to increase the use options:

- **Use as a 4" x 8" trap.**
- **Fold into triangle-shaped delta.**
- **Tear apart at perforation for use in smaller areas or close to base of plants.**

How to use:

- **Fold or tear trap into the desired format.**
- **Peel protective cover from one or both sides of the trap.**
- **Place or hang trap close to plants. When used in large areas, traps should be placed 10 - 15 feet apart.**
- **Monitor traps on a regular basis - replace as needed.**

### **FOR INDOOR and OUTDOOR USE**
