# STICKY TRAPS for APHIDS, WHITEFLIES and FUNGUS GNATS

10 traps per pack  
***Great for flowers  
and vegetables***

Part # FW-75

# STICKY TRAPS

Gardner's Sticky Traps are designed to capture all types of insects that harbor in and around plants. Fungus gnats, white flies, aphids, thrips, and leafminers are just a few of the species attracted to our traps.

We have perforated the **2-sided yellow** traps to increase the use options:

- **Use as a 4" x 8" trap.**
- **Fold into triangle-shaped delta.**
- **Tear apart at perforation for use in smaller areas or close to base of plants.**

## How to use:

- Fold or tear trap into the desired format.
- Peel protective cover from one or both sides of the trap.
- Place or hang trap close to plants. When used in large areas, traps should be placed 10-15 feet apart.
- Monitor traps on a regular basis - replace as needed.

## FOR INDOOR and OUTDOOR USE
