TANGLEFOOT TREE PRUNING SEALER is a ready-to-use, all-weather sealer. It seals pruning cuts and tree wounds and provides a flexible and waterproof seal.

DIRECTIONS: Stir well before applying. Apply to cuts or injured surfaces as soon as possible. Trees can be pruned anytime, however, the best time is during the dormant season. When removing branches, make cuts at the trunk or fork of the tree cutting at a slight angle, cutting just beyond the branches bark ridge. Always make clean, sharp cuts. Pruning sealer is ready to apply as it comes from the container. However, if the material should become thick and heavy, add a small quantity of water and mix thoroughly until the mixture can be spread on in a thin, smooth coat and heavy enough to prevent running.

CAUTION: Contains petroleum distillates. Use only in well ventilated areas. If swallowed, do not induce vomiting. Call a physician immediately. Eye irritant. In case of contact with eyes, flush thoroughly with water. If irritation persists, obtain medical attention. For skin contact, wash with mineral spirits, then soap and water.

STORAGE AND DISPOSAL: Store in a cool, dry place, inaccessible to children and pets. Keep tightly closed in original container. Please recycle container when empty. Do not reuse. If recycling is not available, wrap in newspaper and discard in trash.

NOTICE: To the extent consistent with applicable law, buyer assumes all responsibility for safety and use not in accordance with directions.
