

INSTRUCTIONS AND TIPS FOR BEST RESULTS

FOR INSECT PROTECTION:

- Unfold Insect Guard to desired length, and cut into sections if necessary
- Drape Insect Guard loosely over plants and allow plenty of slack for plants to breathe and grow upright
- For added protection, secure Insect Guard to ground every 6-8 feet using Dalen® Garden Staples

TIPS FOR BEST RESULTS:

- Leave Insect Guard in place until all danger of swarming insects has passed
- For crops that must be pollinated, Insect Guard should be removed periodically during blossom-time
- Remove Insect Guard in warmer weather to prevent damaging your plants
- Insect Guard can also be used to protect plants against birds, heavy rains, and colder weather
