Holographic Scare Tape™

Hang Strips Vertically or Horizontally From Stakes, Posts, Eaves, and Balconies to Scare Birds Away

FOR BEST RESULTS

- Install on poles, stakes, or other vertical supports in a windy area.
- Twist the tape between posts to create flashing spirals.
- Secure with twist ties, wire, string, or adhesive tape (not staples).
- Move tape occasionally to prevent pests from getting used to it.

INSTRUCTIONS

- Cut tape to desired length and attach to supports.
- For garden rows, place tape near the top of the plants.
- For closely spaced garden rows, place on alternate rows.
- For fruit trees, attach to outer branches or tall adjacent poles.
- For large gardens, surround perimeter with tape on stakes or posts, or run lengthwise across garden between stakes or poles to create a protective grid.
