FLEA TRAP

The Flea Trap works by killing adult fleas looking for a pet to infest. The light, heat and infrared rays from the light bulb are strong attractants for fleas. The fleas jump up to the trap, fall through the screen and are killed on the sticky pad. Works without pesticides. A reusable, economical and attractive way to reduce fleas.

EASY DIRECTIONS

1 Peel the sticky capture pad

2 Place the pad in the trap

3 Plug in the trap, catch fleas

4 Dispose of sticky pad when full
