

FLY TRAP

Fill jar $\frac{1}{2}$ full with water and add bait packet. Add 1 or 2 drops of dish soap. Add protein bait like fish, cat food, hot dog or hamburger meat to increase insect catches. Knot one end of hanger and slide through hole in lid. Hang the trap securely away from food areas and out of reach of children and pets. Traps can also be placed on the ground. Wash the trap when full or every 2 weeks. Use a new bait package each time. Do not place the trap in dishwasher. Trap works best in warmer weather.

NOT RECOMMENDED FOR INDOOR USE.
