STICK-A-FLY® GLUE FLY TRAP

STICK-A-FLY® FLY TRAP was researched, developed and tested by a leading entomologist and is effective in trapping houseflies with NO POISONS and NO INSECTICIDE VAPORS.

DIRECTIONS:

STICK-A-FLY® FLY TRAP, is ready to use. Carefully remove trap from box. Place trap with the sticky tube facing the light in areas where flies congregate or are a nuisance (such as window sills). Avoid shaded or dark areas.

Testing shows that houseflies are attracted to other houseflies, therefore,

STICK-A-FLY® FLY TRAP becomes even more effective after a few flies have been caught. Fly behavior responds to temperature, humidity and light conditions. If no flies are trapped within two or three days, it may be necessary to move the trap to a new location.

Discard **STICK-A-FLY® FLY TRAP** and dead insects by wrapping trap and disposing in trash.

KEEP OUT OF REACH OF CHILDREN, pets and other animals. Avoid contact with dead insects. Avoid using in areas where accidental contact with glue could occur.

In case of accidental contact with glue, easily clean up with cooking oil or baby oil.

- NO FILTHY SWATTERS
- NO TOXIC SPRAYS
- NO POISON BAITS
- NO INSECTICIDE VAPORS

| Fly Species | Bait Attractant |
|-----------------|-----------------|
| House Fly | Sugar Syrup |
| Fruit Fly | Decaying Fruit |
| Blow/Bottle Fly | Decaying Meat |
| Male Horse Fly | Sugar Syrup |
| Cluster Fly | Sugar Syrup |
| Drain Fly | Decaying Fruit |
