Safe & Effective Solution

Ladybug LURES

Lures contain a pheromone that tells ladybugs
& other beneficial insects where to find food.

Easy Instructions

Place where aphids and other nuisance insects are present.
Safe for use in food-handling and food storage areas.

- Cut open pouch. Wearing gloves, remove lure from packet. To prevent compromising effectiveness, do not touch lures without gloves.
- Carefully cut through lure to the center as shown below.
- Attach lure directly onto plant stem.
- Use one lure every 6 feet throughout garden or greenhouse.
- Replace lure every 3 to 4 weeks as needed.
- Do not use with pesticides.

Wash hands
thoroughly
with soap &
water after
handling lures

Great for
green peach
aphids that
attack roses

Ladybug Facts

Ladybugs drawn to your garden will feed on destructive insects. Aphids are one of the most destructive pests in your garden and a preferred food source for Ladybugs. Use BioCare Ladybug Lures to keep beneficial ladybugs in your garden longer. These pheromone lures also disrupt aphid colonies. Works best on the green peach aphid that attacks roses.
