

*Don't trap'em,  
Chase'em!*

**NEW!**

Effectively chases Moles, Gophers, Voles, Armadillos and other burrowing animals from lawns, flower gardens and soil areas from early spring to late fall. Not for use where food is grown.

<b>Active Ingredients:</b>	
Castor Oil USP or equivalent .....	65.0%
Sodium Lauryl Sulfate .....	15.0%
<b>Inert Ingredient:</b>	
Water .....	20.0%
<b>Total</b>	<b>100.0%</b>

**CAUTION: KEEP OUT OF REACH OF CHILDREN.** See edge panel for additional precautionary statements.

Net Contents 32 fluid oz.

**PRECAUTIONS AND FIRST AID:** CAUTION. Product can cause moderate eye irritation. For certain individuals, skin irritation may occur. In case of eye contact, rinse with fresh water and seek medical attention. In the case of skin irritation, wash with soap and water and call a physician if irritation persists. **STORAGE AND DISPOSAL:** Store in original container in an area not accessible to children or pets. Do not reuse container. Rinse after use and wrap in newspaper before disposing in trash. **OTHER CAUTIONS:** Do not apply directly to water or allow to enter streams or lakes. **NOTICE:** Buyer assumes all responsibility for safety and use not in accordance with directions.

**NEW Higher Active Formula!**

**CONVENIENT TO USE... NO MIXING OR MEASURING... APPLY WITH YOUR GARDEN HOSE.**

**Uses:** CHASE Mole and Gopher Repellent effectively rids lawns, flower gardens and other soil areas of Moles, Gophers, Voles, Armadillos and other burrowing animals. Not for use where food is grown.

**WHEN AND WHERE TO USE:** Apply as directed below when tunnels or cone shaped mounds appear in soil from early spring to late fall. To determine if tunnels are active, flatten tunnels and examine in 24-48 hours. As moles begin to react to CHASE, increased tunneling activity may even be noted. Active tunnels will reappear and should be re-flattened after CHASE is applied.

**USING AND CONNECTING SPRAYER:**

1. Shake well before using.
2. Thread garden hose into sprayer connector.
3. Rotate front plunger on sprayer body and push in fully.
4. Check rear sprayer valve to assure it is in the "OFF" (vertical position) and turn on water.

5. Open rear sprayer valve (horizontal position) and point away to begin applying.

**USE DIRECTIONS:**  
*Note: If soil is dry, water for fifteen minutes before applying CHASE.*

1. Begin spraying CHASE to area, using a systematic routine to assure full coverage.
2. Areas larger than 50' x 100' may be more effectively treated on successive days (or even with several days in between) in sections roughly one third of the total area, beginning with the one farthest from the desired mole exit point.
3. To apply CHASE evenly, occasionally check the see-thru bottle stripe to determine usage and amount remaining to be applied.
4. After application, water treated area for 15 minutes to speed penetration of CHASE.

*Don't trap'em,  
Chase'em!*
