

BSFL NUTRIENT +

One gallon contains the 3-3-5 and 3-1-2 inputs, derived from hydrolyzed BSFL, Frass, and phosphoric acid (used as a stabilizer).

- Two Cups Emulsified BSFL
 - N P K
 - 3-1-2
- Two Cups BSFL Frass
 - N P K
 - 3-3-5
- Pure Well Water

Directions

Shake Well

For best results, use monthly.

Trees: Add one cup (undiluted) for each three feet of tree height, then water deeply.

Garden: Dilute 4:1 (four cups water to one cup Nutrient +) pour on soil

Starts: Dilute 8:1 (eight cups water to one cup Nutrient +) pour on soil

For damaged trees or plants, use weekly for four weeks (on freshly added compost, .5 CF per 3 feet of tree)

Not recommended for seeds
