NATURAL & ORGANIC GARDEN AND LANDSCAPE PRODUCTS

# TANK'S PROLITE

## SEEDING & POTTING MIX

PREVENTS COMPACTION AND MAINTAINS AERATION TO ROOTS. PROVIDES THE CRUCIAL BALANCE OF MOISTURE AND AERATION FOR SUCCESSFUL SEED GERMINATION. NOURISHES YOUNG PLANTS FOR A STRONG START.

*Ingredients: Tank's Organic Compost, Organic Coconut Coir, Perlite*

Good for  
People, Plants,  
and Planet

### Seeding:

Fill seeding tray or pot with Mix.  
Sow seeds according to instructions on package.  
Water gently and generously.  
For best results, keep consistently moist, give adequate light. Bottom heat can improve germination.

### Potting:

Fill a container (with adequate drainage) with Mix to within 1-2" of the brim, tap to settle. Dig a hole in the center and place the plant, fill to surround the rootball. Take care not to leave air pockets, and maintain the same soil level on the plant stem. Water accordingly, generally keep the soil moist but not wet, ensure that water drains from the bottom. Use Tank's SuperMix Organic Fertilizer to feed.

16 quarts  
0.64 cubic feet  
(18.80 liters)
