Horticultural Charcoal

Premium Raw Biochar

What is Biochar?

Biochar is a type of charcoal made from plant materials such as hardwoods, grasses, and agricultural and forest residues that are decomposed at high temperatures, often during renewable energy production. During the process, the physical and chemical properties of the plant material change into a porous, stable, carbon-rich by-product known as biochar.

Why use it?

Biochar has been used in agriculture for many centuries. Adding biochar to soil has the potential of increasing soil carbon, soil nutrient content, increased water retention and water-soluble nutrients, and increased beneficial microbial life.

DIRECTIONS

Best results are achieved when adding this mix to your soil at least 5-7 days BEFORE planting. However, this can be used at any time in the planting process.

Optimal ratio for most gardeners is 5-10% biochar in the top 6 inches of their soil. (1 part Bio Char to 9 parts planting soil).

Indoor Plants (container plants, seeds, cuttings, transplants): Use a small rake or spoon and hand-mix this product around the plant within your desired container. Best results are adding close to the root zone. You can also just layer a light dusting on the top and water in as usual.

Outdoor Plants (Gardens, Bedding Plants, Ornamentals): Use your conventional tiller and rake and till directly into the soil. Adding more over time can increase product performance.

Trees and Shrubs: Best when applied to the root zone area. Rake into this area and water as desired.

Compost Mix: Mix as needed within your compost process – use as desired as you would your final compost.

This product is not intended to be used as a soil substitute.

WARNING! MAY FORM COMBUSTIBLE DUST CONCENTRATIONS IN AIR. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard. Keep away from all ignition sources including heat, sparks, and flame. Dusts may be irritating. Causes eye irritation. Wash hands thoroughly after handling. Store unused product in a dry place inaccessible to children and pets. **Recommended:** protective eyewear, gardening gloves, dust mask if dusts are generated.

CONTAINS NON-PLANT FOOD INGREDIENTS

Soil Amending Guaranteed Analysis: 100% Western Pine Wood Biochar

WARNING: This product can expose you to Arsenic, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

Limitation of Liability: P.F. Harris Manufacturing Company, LLC makes no warranties of merchantability or of fitness for a particular purpose, nor any other express or implied warranty except as stated above. Buyer assumes all responsibilities for safety and use not in accordance with label directions and precautionary statements.

Warning: To avoid the danger of suffocation, keep this plastic bag away from babies and children. Do not use this bag in cribs, beds, carriages, or playpens. This bag is not a toy.
