

BIO 520 contains high performance minerals to promote plant cultivation.

INGREDIENTS

Micro and Macro Essential Minerals, developed in Japan from Pressurized Volcanic Magma and sea sediments with our Proprietary Atomization technology to break down the organic material to its simplest form.

DIRECTIONS *(Shake well before use)*

For Irrigation, dilute 1 part concentrate to 1,000 parts irrigation water. Irrigate at normal volumes and frequency.

For Seed Germination, dilute 1 part concentrate to 500 parts irrigation water.
