

PFEIFFER BIODYNAMIC

Compost Starter

Healing the Earth...Creating Humus

Net Wt. 1 oz. Makes 1.5 Tons of Compost

Lot #

Batch #

Pfeiffer Biodynamic Compost Starter is used for creating healthy, effective compost for use in all forms of agriculture. It contains the BD #500 and #502-507 (compost preps) which stimulate the proliferation of beneficial soil organisms and enzymes leading to the creation of the most vital compost on planet Earth.

Activation Instructions:

Mix the Pfeiffer BD Compost Starter with enough lukewarm water to yield a fully moistened paste-like substance. Store the mixture in a warm place for approximately 12 hours before application. The mixture once activated is usable for up to 48 hours.

Application Instructions:

The mixture must be activated for at least 12 hours before use.

Dilute the activated compost starter with sufficient water to fully cover the area to be composted. The amount of water is dependent upon the calibration of your spray equipment or the method of application.

Apply the diluted mixture while building the compost pile or mixing the materials. The material being composted should be thoroughly permeated with the activated, diluted Pfeiffer BD Compost Starter.
