

PFEIFFER BIODYNAMIC

Field & Garden Spray

Healing the Earth...Creating Humus

Net Wt. oz. Fertility for up to Acres

Lot # Batch #

Pfeiffer Biodynamic Field & Garden Spray aids the transformation of organic materials already in the soil into humus. It contains the biodynamic agricultural preparations BD #502, #503, #504, #505, #506 and #507, as well as BD #500 which stimulate the proliferation of beneficial soil organisms. Its use accelerates the breakdown of organic matter without tying down nitrogen and leads to the creation of healthy soil with abundant humus.

Activation Instructions:

Mix the Pfeiffer BD Field & Garden Spray with enough lukewarm water to yield a fully moistened paste-like substance. Store the mixture in a warm place for approximately 12 hours before application. The mixture once activated is usable for up to 48 hours.

Application Instructions:

The mixture must be activated for at least 12 hours before use.

Dilute the activated field & garden spray with sufficient water to fully cover the area to be sprayed. The amount of water is dependent upon the delivery rate of your spray equipment.

Apply the diluted mixture to the land at the rate of one unit per acre.
