

Trial Location & Researcher

University of Kentucky, Dr. Raul Villanueva

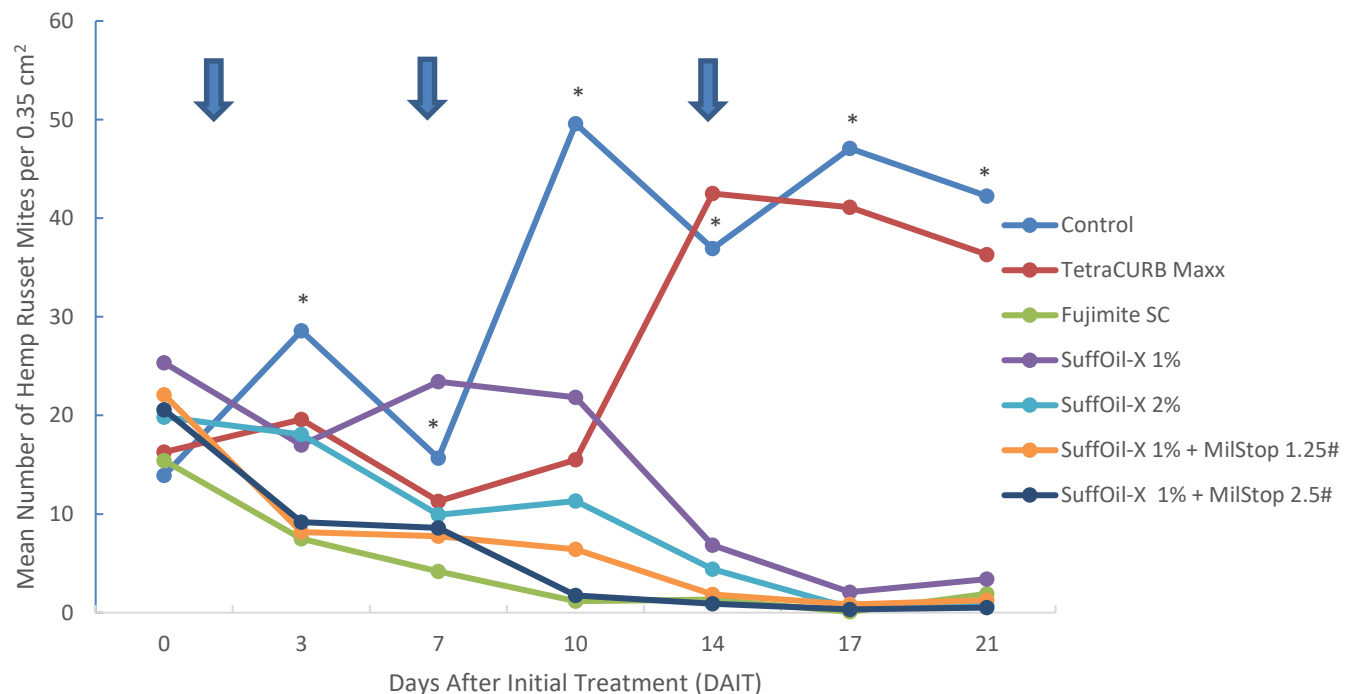

BioWorks Products Included in Trial

SuffOil-X®
MilStop® SP

Summary: SuffOil-X applied alone or tank-mixed with MilStop SP controlled hemp russet mites on field-grown hemp. Treatments containing SuffOil-X provided similar control as the chemical standard FujiMite SC.

Treatment	Rate/100 gal
Untreated Check	-
TetraCURB MAX	1 gallon
FujiMite SC (Fenpyroximate)	3 pints
SuffOil-X	1 gallon
SuffOil-X	2 gallons
SuffOil-X + MilStop	1 gallon + 1.25 #
SuffOil-X + MilStop	1 gallon + 2.5 #

Method Summary	
Crop	Hemp (<i>Cannabis sativa</i>)
Variety	Baox
Location	Princeton, Kentucky, USA - Field
Pest	Hemp russet mite (<i>Aculops cannibicola</i>)
Trial Design	Completely Randomized Design
Application Dates	8/6/2021 (All treatments) 8/13/2021 (All treatments except FujiMite) 8/20/2021 (All treatments except FujiMite)
Application Method	Foliar Spray

Mean number of hemp russet mites per 0.35 cm² leaf area analyzed. Arrows indicate treatment timing. Asterisks indicate where significant differences among means were detected.

Result Summary

- No phytotoxicity was observed during the trial.
- SuffOil-X at 2 gallons/100 gallons provided faster knockdown than SuffOil-X at 1 gallon/100 gallons.
- SuffOil-X at 1 and 2 gallons/100 gallons provided statistically similar efficacy throughout the experiment (except for 7 DAIT).
- SuffOil-X tank-mixed with MilStop SP was as effective as SuffOil-X applied alone.
- SuffOil-X applied alone or tank-mixed with MilStop SP controlled HRM as well as the chemical standard FujiMite SC.

Recommendations from Data

- Apply SuffOil-X at 1 gallon/100 gallons under low to moderate mite pressure.
- Apply SuffOil-X at 2 gallons/100 gallons under moderate to high mite pressure.
- If the crop is at risk from powdery mildew as well as HRM, tank-mix SuffOil-X at 1 gallon/100 gallons and MilStop SP at 1.25 (preventative) or 2.5 (curative) pounds/100 gallons.
- SuffOil-X and MilStop SP can be tank-mixed or rotated with chemical pesticides for resistance management of arthropods and diseases.
