

# GARD'N PAPER WEED CONTROL

## STEP 1

## STEP 2

## STEP 3

**STEP 1** - Unfold and unroll material and cut to desired length. Fit around plants or cut slits in material to fit over plants. Overlap any adjacent sections by 3 inches. Secure ends of fabric to ground with Dalen® Garden Staples.

**STEP 2** - Install new plants by cutting X's in the material. Shrubs, trees, and small plants can be easily inserted and planted in the soil beneath.

**STEP 3** - Cover completely with 2 inch layer of pine needles, wood chips, or shredded bark mulch to protect it from the sun.

## NO REMOVAL NECESSARY

Paper can be tilled directly into the earth at the end of the season to help amend the soil.
