pH Down®

pH Down® is a natural way to lower the pH of hydroponic and other fertilizer solutions, and reduce the pH of soil. The organic acid present in pH Down® gently lowers the pH of water and may increase nutrients uptake by complexing with fertilizer solutions. Most plants thrive at slightly acidic conditions. Unlike other hazardous pH lowering agents pH Down® is safe to handle. pH Down® is suitable for use in organic food production.

CONTAINS ORGANIC ACIDS

DIRECTIONS FOR USE: SHAKE WELL BEFORE USE.
