

Weed Zap®

Non-Selective
All Natural Herbicide

Protection

Weed Zap® is an all natural non-selective herbicide. Weed Zap® “zaps” small broad leaf and grassy weeds. Its natural ingredients will eliminate plants that are 6 inches in height or less. These active ingredients are listed as food grade materials so Weed Zap® is safe to use around children and pets.

Weed Zap® is an excellent tool for IPM programs and has a long residual effect. Weed Zap® does not damage non-green, woody plant parts. Since Weed Zap® is a contact herbicide, adequate coverage is important. Applied with Safergro®’s Natural Wet® for good coverage.

APPLICATION GUIDELINES

Apply Weed Zap® when weeds are actively growing. For best results, apply during warm, sunny weather above 60° F. Apply when air is calm to prevent drift to desirable plants. Retreatment may be necessary if it rains within 4 hours of application. Coverage is essential to establish control. Repeat application as necessary. For best result apply before weeds are over 6 inches tall.

Final Dilution Volume	fl. oz of Concentrate
1 Gallon Water.....	6.4 oz Weed Zap®
5 Gallon Water.....	32 oz Weed Zap®
10 Gallon Water.....	64 oz Weed Zap®

BENEFITS OF USING WEED ZAP®

- Easy to mix and supply
- Suitable for organic production
- Kills most weeds in 12 hours
- Effective on broadleaf weeds and grass
- Long residual effect
