

Stop Odor in It's Tracks

Powered by naturally fermented probiotics, SCD Probiotics® Barn Kleaner neutralizes the odors that attract flies and pests on contact, then breaks down remaining compounds so odor stays away.

Safe, effective, and chemical-free, this do-it-all barn cleaner can be used on any surface in barns, barnyards, livestock pens, and feeder lots—and even sprayed onto manure piles to help accelerate decomposition. The result is long-lasting odor removal and a cleaner, healthier environment for you and your livestock.

- Easy-to-use with a backpack sprayer or portable hand sprayer
- Features 14 probiotic strains grown “in consortia,” a proprietary process of co-growth that increases effectiveness
- Shelf stable; no refrigeration required
- Safe for people, animals, plants, and the planet

Barn Cleaning

Using a backpack sprayer or portable hand sprayer, spray SCD Probiotics® Barn Kleaner on all surfaces, including floors, walls, and ceiling. Apply at a minimum rate of 1 cup per 2.5 gallons of water. Spray twice per week, or more often as needed. Include the bedding area and manure inside the barn.

Manure Treatment

Move manure outside the barn to a protected location, away from moisture. Spray manure pile with Barn Kleaner at a rate of ½ cup per 3 gallons of water (1:100). Spray over the top of the manure each time you add to the pile or create a new pile. After several weeks, pull from the bottom of the pile to use the “composted” manure.

Storage

Store at room temperature and away from direct sunlight.
