

BioWorks Products Included in Trial

Cintro Insecticidal Soap

Summary:

Cintro significantly outperforms both horticultural oil and distilled water in controlling diamondback moth larvae.

Method Summary	
Pest	Diamondback moth (<i>plutella xylostella</i>)
Location	Victoria, B.C
Method	Laboratory bioassay
Evaluation Interval	1 and 2 days after treatment
Application Method	Larvae were sprayed directly with treatments and transferred immediately to petri dishes containing a cabbage food source and the mean percentage mortality was assessed.

Control of diamondback moth larvae in a lab bioassay
2 days after treatment
