

Protect Your Crop Organically

Our Product

- **Greenhouse**

Spray Garlic Barrier on leaves, lower branches, and around the greenhouse to control spider mites, aphids, fungus gnats, and powdery mildew. Safe for plants, workers, and pets.

- **Hydroponics**

Dilute Garlic Barrier in water to safely repel pests and prevent fungus without affecting your nutrient solution or plant flavor. Works on roots, leaves, and surrounding surfaces.

- **Indoor Growing**

Apply to canopy and lower leaves to repel insects and prevent fungal outbreaks. All-natural, odorless, and safe for workers while keeping flowers clean and chemical-free.

How It Works

Simply mix Garlic Barrier with water and spray your canopy or feed at the roots. Its systemic action keeps pests away naturally and—no chemicals, no residues, no risk to your organic certification.
