

**2 PART**

**Organic Dry Nutrient**

# GEOFLORA

Organic Dry Nutrient

## FORM FACTOR

Designed with the end user in mind, Geoflora Nutrients is a **2-part fully organic dry nutrient** formulated to address the problems associated with applying organics on a large scale, while still delivering the results growers expect from their tuned organic regimens. The **dustless, granular form factor** of Geoflora Nutrients ensures all 20 of the high quality organic inputs are delivered evenly and effectively **without creating harmful, irritating airborne dust** during the amendment process.

## BIOLOGY

Our added biological charge aids in taking each of the **20 organic ingredients** to their full potential, creating a **web of living soil biology** designed to aid in the transport and availability of key micro and macronutrients, as well as a comprehensive profile of amino acids and vitamins **necessary for healthy plants and heavy yields**.

*\*based on MSRP price.*

## RESULTS

An **economical alternative to many nutrient systems** currently on the market, Geoflora Nutrients offers an easy to use, complex assembly of organic inputs to users while **reducing run cost of nutrients by 20% or more\***. Trials of Geoflora Nutrients in a commercial setting saw an average of **20% increase in final product potency**, and **10% average increase in terpene production** compared to competitor products.

## FEED CHART

WEEK	0	2	4	6	8	10	HARVEST
VEG	8 oz	8 oz	8 oz	-	-	-	-
BLOOM	-	-	-	8 oz	8 oz	8 oz	-

### WEEK 00

Apply Geoflora VEG at transplant by amending into the soil. This will start the development of healthy microorganism colonies and kick-start nutrient availability.

### WEEK 04

Final application of Geoflora VEG in week 4, allow nitrogen to be used throughout week 4 and 5.

### WEEK 06

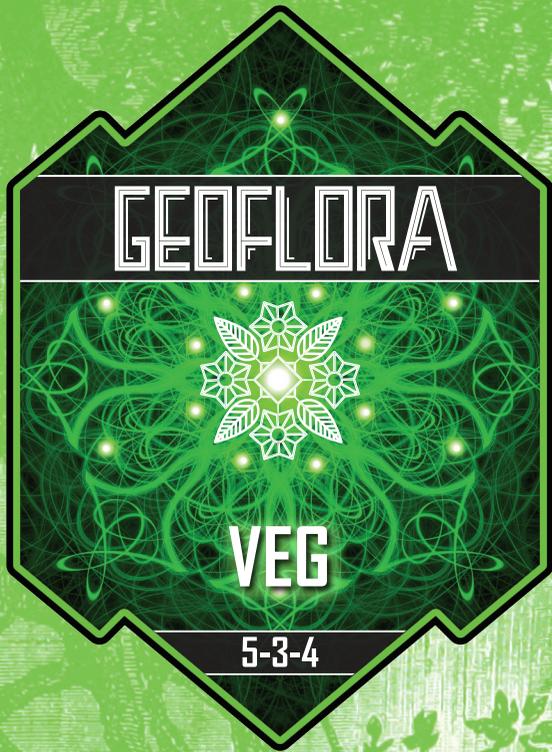

Geoflora BLOOM has reduced nitrogen to ease plants through transition and increased phosphorus and potassium for flower site development.

### WEEK 10

Stop using Geoflora BLOOM in Week 10, or two weeks prior to harvest.

*Rates are measured per cubic foot of growing media or a single 10 gallon pot.*

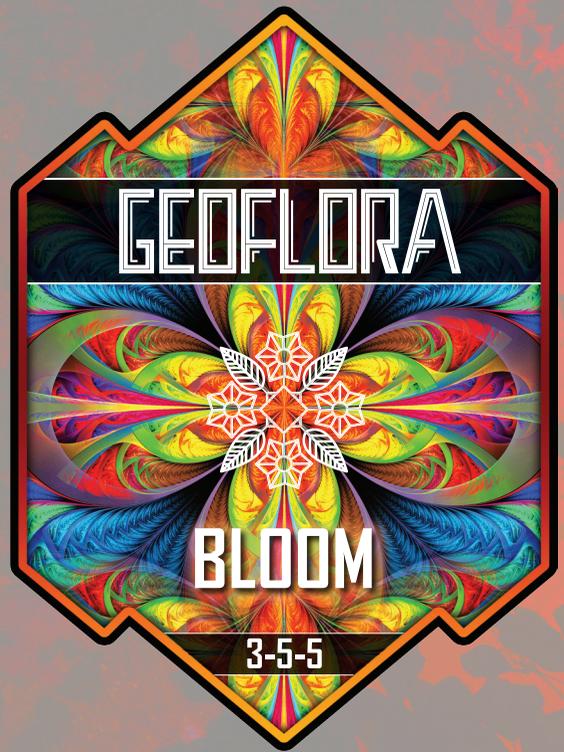

*Geoflora Nutrients can be used as a stand alone system, or as a base to compliment your favorite liquid and dry nutrient additives.*

Geoflora VEG is a 5-3-4 NPK formula designed to be applied during transplant and as a top dress to ensure vigorous growth in plants while also creating an established, well-supported microbial environment as your plants progress through their life cycle.

- Establishes strong microbial activity for increased nutrient uptake and availability.
- Multiple sources of organic nitrogen discourage burning and work together with microbes to ensure a balanced release cycle and a diverse profile of micronutrients.
- Promotes vigorous canopy growth and healthy root development.

**Key ingredients:** Kelp, Feather Meal, Crustacean Meal, Alfalfa Meal, Fish Protein Hydrolysate.

Geoflora BLOOM is a 3-5-5 NPK formula with reduced nitrogen levels to help ease the plant through the transition phase and bolster flowers and fruit production.

- Diverse P & K sources for immediate and slow release phosphorus, reduced nitrogen to ease through transition.
- Enhanced secondary metabolite production
- Promotes abundant fruit and flower development
- Can be used with nutrient supplements and bloom additives

**Key ingredients:** Fossilized Seabird Guano, Bat Guano, Bone Meal, Fish Bone Meal, Potassium Sulfate, Yucca.

## Organic Dry Nutrient

Geoflora Nutrients was created out of a need for an easy to use organic fertilizer that could be deployed on a large scale without the downsides of traditional organics.

By combining a granular form factor with a wide range of carefully selected ingredients, Geoflora Nutrients delivers a balanced charge of beneficial bacteria and over 20 organic inputs with diverse macro and micronutrient profiles which work together to produce a simple yet effective solution for organic cultivators who want to see results – without the hassle.
