

Repel Mosquitoes Naturally

Mosquito Barrier®

Our Product

- **Yards & Landscapes**

Use on lawns, shrubs, trees, and shaded areas to repel adult mosquitoes for up to a month. Made from highly concentrated “super garlic,” it is safe for people, pets, and plants when used as directed.

- **Outdoor Areas**

Dilute with water and spray around homes, patios, decks, fences, and entry points to keep mosquitoes out of treated areas and away from the house. Odor dissipates quickly for humans, but mosquitoes remain repelled.

- **Standing Water**

Apply to standing water to suffocate mosquito larvae before they mature. All-natural, non-toxic to bees and butterflies, and safe for children, birds, fish, and pets while providing season-long mosquito control.

How It Works

Simply mix Mosquito Barrier with water and spray lawns, foliage, or shaded areas. Its garlic-based action keeps mosquitoes away naturally—no chemicals, no residues, no risk to people, pets, or beneficial insects.
