

**LIQUID
FERTILIZERS
2.0**

The latest formulation of our liquid fertilizers delivers an ideal nutrient combination and ratio to support strong, healthy cannabis plant growth.

WE HEARD YOU!

We're constantly searching out ways to improve and better meet the needs of our customers. And who knows our products better than anyone? The people who are using them every day – you! You provided feedback, and we listened. The result: the next generation of our liquid fertilizers.

- **Grow 2.0 A&B**
- **Bloom 2.0 A&B**
- **Bulk 2.0**
- **E-Plus 2.0**

WHAT'S DIFFERENT?**1. DYE-FREE**

The coloring of our new and improved fertilizers is from completely natural, raw ingredients – no dyes added! Because of this, slight color variations and visible microparticles are normal and may occur from batch to batch.

3. ADDED FULVIC ACID

Grow 2.0 B and Bloom 2.0 A

As a bonus, a bit of fulvic acid was added to the above products to promote plant growth and quality.

2. INCREASED MAGNESIUM

Adding Epsom salts for magnesium deficiency? Not anymore! We understand the importance of this crucial nutrient to cannabis health and development, so we increased the magnesium content in the 2.0 lineup.

4. SMOOTHER LINE FLOW

Thanks to reduced organic carbon, you can rest assured that the latest version of our liquid fertilizers corrects occasional issues with line clogging based on different irrigation setups. You can expect optimum flow in the nutrient bases and Bulk 2.0. **Excludes E-Plus 2.0*

READY TO WET YOUR PLANTS?

Try our liquid cannabis fertilizers today. Visit www.rxgreentechnologies.com/contactus.

Grow 2.0 A&B: Vegetative Growth

Our carefully balanced, 2-part fertilizer is formulated for optimal vegetative growth. Grow 2.0 A and Grow 2.0 B promote plant vigor and support photosynthesis.

How to use:

1. Using our feed chart as a guide (found on our website at www.rxgreentechnologies.com/feed-charts)
2. Mix Grow 2.0 A in water and add an equal amount of Grow 2.0 B and mix well.
3. Apply as a drench in any type of growing media or hydroponic system.

Bloom 2.0 A&B: Reproductive Growth

Meet the nutrient demands of flowering plants – the macro- and micronutrient blend in Bloom 2.0 A and Bloom 2.0 B support optimum plant health.

How to use:

1. Using our feed chart as a guide (found on our website at www.rxgreentechnologies.com/feed-charts)
2. Mix Bloom 2.0 A in water and add an equal amount of Bloom 2.0 B and mix well.
3. Apply as a drench in any type of growing media or hydroponic system.

Bulk 2.0: PK Booster

A blend of phosphorus, potassium, and calcium, Bulk 2.0 gives your plants the extra support, energy, and growth they need in the flowering stage.

How to use: Add to base nutrients as directed per the Rx Green Liquid 2.0 Feed Chart (found on our website at www.rxgreentechnologies.com/feed-charts)

E-Plus 2.0: Kelp and Yucca

Enhance your plants' nutrient delivery and uptake and stress tolerance with this organic nutrient additive, made with kelp and yucca.

How to use: Add to base nutrients as directed per the Rx Green Liquid 2.0 Feed Chart (found on our website at www.rxgreentechnologies.com/feed-charts)
