

# SNS

# 203™

## ALL NATURAL Root Drench Pest Control

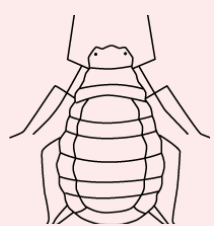

### HOW IT WORKS

SNS 203 has active ingredients that cause pests to dehydrate and die. It also attacks fungus and algae, reducing the food source for pests.

### PESTS

Kills & repels root aphids, fungus gnats, white flies, gnat larvae, thrips, & more.

Root Aphid

White Flies

Fungus Gnat

### BENEFITS

- Dip your clones to keep them pest free
- 0-Day re-entry interval
- EPA Exempt
- Safe around children and pets

\*When used as directed

### SIZES AVAILABLE

## APPLICATION INSTRUCTIONS

### ROOT DRENCH

Shake well before mixing. Mix 2-4 oz. per gallon of water. Thoroughly drench affected area and surrounding areas.

### FOLIAR SPRAY

Mix 2-6 oz. per gallon of water.  
Spray Foliage to point of runoff.

### HYDROPONICS

Hydro Tray: Pour solution over roots and drain into the system. Flush system after use.

Bucket Drench: Soak root system in 5 gallon bucket for 5-10 minutes. Rinse, return to system.

Use 203 every 7-14 days for preventative maintenance
