

MEET Trapline t⁺

Superior thrips control for added peace of mind.

Introducing Bioline AgroSciences' premium sticky trap for control of Western Flower Thrips — incorporating thripline pheromone to maximise thrips catch.

WHY CHOOSE TRAPLINE T+

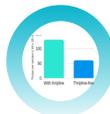

Thripline pheromone incorporated in glue maximises Western Flower Thrips attraction.

Microencapsulation of pheromone ensures release for more than 5 weeks.

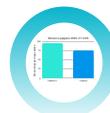

Patterning optimised for several thrip species: Western Flower Thrips and *Thrips major*.

Maximise trap catches with scientifically optimised colour.

Formulated thermostable glue to improve efficacy. Active from 10°C. Thermostable up to 85°C.

Proven efficacy for increasing trap catch and preventing crop damage.

Targets: Thrips
Code: P8052-15
Description: Wet blue patterned roller traps with Thripline pheromone, 15 cm x 100 m. **Qty:** 2 per unit.

MEET Trapline t⁺

Superior thrips control for added peace of mind.

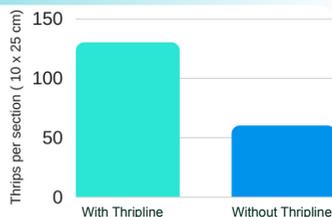

4

SUPER INGREDIENTS FOR EASY AND EFFECTIVE THRIPS CONTROL...

1. ADDING PHEROMONE

In replicated field trials carried out by Russell IPM, Trapline t⁺ (which features pheromone) significantly increased the thrips trap rate by 30 -100%.

**Increased
30-100%.***

2. COLOUR MATRIX

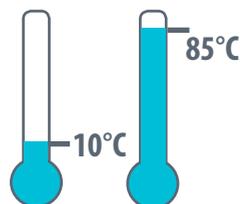

- 53-87%^{*} reduction in thrips.
- 67-92% increased^{*} Strawberries.
- Increased grower returns of £2k/ha.^{*}
- Reduced insecticide treatments.
- No interruption of pollination or predators.
