

UNLEASHTM

ROOT INOCULANT

UNLEASH ROOT INOCULANT IS A DYNAMIC BLEND OF BENEFICIAL ROOT ZONE MICROORGANISMS THAT PROMOTE NUTRIENT AVAILABILITY TO PLANTS.

⚡ **Higher Yields**

⚡ **NPK Availability & Absorption**

⚡ **Micronutrient Availability**

⚡ **Nitrogen Fixation**

⚡ **Vigorous Root Growth**

⚡ **Mycorrhizae Growth**

FOR SOIL & HYDROPONICS

UNLEASHTM

ROOT INOCULANT

UNLEASH contains a dynamic blend of beneficial naturally occurring soil microorganisms that promotes root zone biological activity, including nutrient uptake in plants.

⚡ **UNLEASH promotes nitrogen availability to plants.**

⚡ **UNLEASH promotes uniform ripening of treated plants.**

⚡ **UNLEASH boosts plant immune system and increases stress tolerance.**

DIRECTIONS Unleash is applied at a rate of 1 liter per acre which is split into 2 applications of 500 mL (or 2 cups).

Application 1

2 Cups   + 10G 

Shake well, then mix the 500 mL (or 2 cups) of Unleash with 35 liters (or 10 gallons) of non-chlorinated water.

Application 2

2 Cups   + 10G 

Proceed with the second application 3 weeks after the first application to complete the treatment.

Step 1: For optimal results, allow mixture to rest for 20 minutes up to 4 hours before applying. If needed mixture can be applied up to 3 days after mixing.

Step 2: Inject gradually to ensure it is evenly spread throughout the acre.

Step 3: Continue watering to ensure the bacteria reach the root zone of the plants, typically 2-6 hours more.

ATTENTION: Unleash is sold as a concentrate, and must be mixed in a clean non-metal container with non-chlorinated water to activate. Using a larger amount of Unleash than recommended will not damage plants. This is a suggested application schedule only, for further information refer to the application guides on www.unleashorganics.com or call toll-free **1-888-285-7665**.
