

NemaSeek™

BENEFICIAL NEMATODES

Heterorhabditis indica

These lethal and aggressive nematodes will seek out the pupal stage of soil dwelling pests, particularly the small hive beetle. They will also go after fall armyworms, fungus gnats, indianmeal moths, root weevils, western flower thrips and white grubs and more.

IMPORTANT! PLEASE READ

- Ice pack will be melted. It is normal for package to feel warm upon arrival. As long as the temperature has not been in excess of approx. 100° inside the package, the BN should not be harmed.
- Keep in cooler until ready to use. Replace ice if necessary.

SEE INCLUDED SHEET FOR FULL APPLICATION INSTRUCTIONS.

- Apply BN at dusk or early morning. Water area you will be covering first, followed by the BN application. Lightly water after application.
- Make sure you cover the entire affected area.
- Keep soil moist for 2 weeks after applying BN. BN only parasitize insects with a developing soil borne stage. They will not harm people, plants or pets. Keep out of reach of children, avoid inhalation and avoid eye contact. If product comes into contact with eyes, flush thoroughly with water. Do not reuse container. Not for ingestion by humans or animals.
