Orchards, and Fields.**

**KEEP OUT OF REACH OF CHILDREN
TENIR HORS DE LA PORTEE DES ENFANTS
MANTENGA FUERA DEL ALCANCE DE LOS NIÑOS
SEE SIDE PANEL FOR ADDITIONAL CAUTION**

BRUSH-ON TANGLE-TRAP STICKY INSECT COATING is a specially prepared insect trapping adhesive. It is ready to use and will remain sticky until covered with insects or foreign matter. It will monitor and detect the relative abundance of insects.

DIRECTIONS: Stir with brush applicator before use. Apply a thin 1/16" (1.6 mm) coating to trap surface. Traps can be made with waxed cardboard, glass, wood, plastic cups or sheets, milk cartons, red sphere traps or other non-porous surfaces. Attractants or color can be used to lure insects. Place traps in desired location attached to stakes or suspended, away from children and pets to avoid accidental contact. Observation and experimentation are recommended to achieve maximum results.

CAUTION: Contains petroleum distillates. Do not use or store near heat or open flame. Use in well ventilated area. If contact with eyes, flush thoroughly with water. If irritation persists, obtain medical attention. For skin contact, wash with mineral spirits or cooking oil, then soap and water. Store in cool dry place, inaccessible to children and pets. Keep tightly closed in original container.

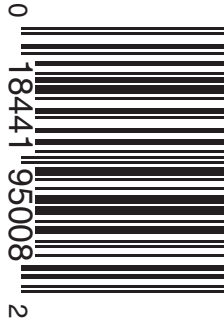

Please recycle when empty.
Do not reuse container.
