# Features and Specifications

- Programmable alert with preset temperatures for specific foods.
- 99- hour, 59- minutes countdown timer and count up timer.
- Stainless steel temperature probe with silicon cord.
- Temperature range of probe: 32 °F to 572 °F (0°C to 300°C)

- Temperature reading in °F or °C.
- Flip-out counter top stand and magnet.
- Uses one AAA Battery (included).

#### Important Notes/Warnings

- This product is not for use in microwave ovens.
- Keep out of reach of children.
- Do not touch hot probe or wire with bare hands. Always wear a heat-resistant glove.
- Do not expose probe directly to flame. Doing so will cause wire deterioration.
- When not in use, slide the mode selector switch to the off-position 0 to conserve the battery.
- The probe should not be exposed to oven temperatures exceeding 716°F (380°C).
- Do not let probe or cable come into direct contact with the oven elements, as this will result in faulty readings and/or damage.
- If the temperature exceeds or falls below the measurable ranges, the LCD screen will display on HHH or LLL.

## Operating Instructions

- Clean the probe with hot soapy water and rinse. Do not submerge the probe and cable in water.
- Silicon cord should be free of knots and freely insert into the socket. If probe is knotted or not fully installed display will show LLL • Slide the switch on the back to display temperature
- reading in F° or C°. Slide the mode selector switch to the cook position.
- You will see two temperatures on the LCD display. On the left is the actual temperature reading as measured by temperature probe and on the right is the set temperature. The default reading is 212°F.
- Set your desired cooking temperature by choosing guick Temperature Setting or manual Temperature Setting.
- Insert the tip of the probe at least 2" into the thickest part of the meat, but not near bone or gristle.
- Place food into the oven. Before closing the oven door, make sure there is enough slack in the cable to prevent the probe form being pulled out of the food when the oven door is closed. The base unit must be positioned outside of the oven on a stable surface.

- To prevent damage to the unit, do not place on a hot surface.
- When the internal temperature reached temperature set temperature and alert will sound. To stop the alert, slide the mode selector to 0 or disconnect the temperature probe from the base an alarm will stop within 30 seconds. • Before removing the food from the oven, disconnect the
- cable from the base unit. Do not touch probe or cord with bare hands during or just after cooking. Always wear heat-resistant glove.
